

PRAGADEESWARAN V

BUSINESS & FINANCIAL ANALYST

Trichy, Tamil Nadu, India - 621305 | +91 9345832080 | pragadeesh2704@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Electronics & Communication Engineering graduate with interests in analytical and data-oriented processing areas with experience in healthcare data validation and a strong foundation in business analytics, financial risk, data visualization and prompt engineering. Skilled in SQL, Power BI, Excel, Python, and DAX, with hands-on experience developing dashboards and risk analytics projects. Certified in AML/KYC and business analytics, with a demonstrated ability to analyse complex data, identify patterns, and translate insights into practical business decisions. Seeking opportunities in data analytics, business analytics, financial risk, or related analytical roles.

SKILLS

Hard Skills

- Financial & Business Analytics
- Data Analytics & Business Intelligence
- Data Visualization
- Power BI & DAX
- SQL
- Python
- Prompt Engineering
- MS Excel & MS Office
- AML Transaction Monitoring & KYC Analysis
- JIRA, Agile & Scrum
- Risk Analytics & Dashboard Development

SOFT SKILLS

- Analytical Thinking
- Problem Solving
- Communication
- Teamwork & Collaboration
- Attention to Detail
- Adaptability
- Time Management

WORK EXPERIENCE

AR Process Associate (Data & Insurance Verification)

Oct 2025 - Mar 2026

Omega Healthcare

Trichy, Tamil Nadu

- Executed high-volume healthcare financial and insurance data validation across multi-payer databases, auditing claim parameters and pharmacy billing records with 98%+ verification accuracy.
- Analyzed financial eligibility discrepancies and claim variance patterns to identify root-cause billing anomalies, preventing claim rejections and optimizing revenue recovery workflows.
- Monitored daily verification performance metrics using data analysis to streamline workflows and improve turnaround times by 15%.

IoT Systems Intern (Intern)

Jul 2024 - Aug 2024

Aiverz Technologies

Trichy, Tamil Nadu

- Completed intensive hands-on training engineering hardware-software data communication interfaces and integrating sensor modules with microcontrollers for real-time telemetry.
- Optimized data transmission protocols, reducing telemetry packet loss and improving data logging accuracy across embedded hardware nodes.

PROJECTS

Retail Sales & Business Intelligence Dashboard

GitHub available on portfolio

- Developed an executive BI dashboard in Power BI analysing retail revenue performance, customer purchasing trends, and profit & loss metrics across multi-dimensional perspectives.
- Built custom DAX measures and Power Query ETL pipelines for data cleansing, star-schema modelling, and dynamic KPI calculation to support data-driven decisions.

Small-Lender Loan Portfolio Analytics, AML & KYC Risk Dashboard

Live demo & GitHub available on portfolio

- Architected an end-to-end AI – assisted financial risk analytics portal in React.js tracking lending portfolio performance, collection rates, and Non-Performing Loan (NPL) health metrics via interactive visualizations.
- Engineered a rule-based Anti-Money Laundering (AML) transaction monitoring engine detecting suspicious structuring, smurfing, and rapid loan cycling patterns with automated alert generation.
- Implemented a weighted KYC risk-scoring model classifying borrowers into Low/Medium/High risk categories to support Enhanced Due Diligence (EDD) and regulatory reporting.

AI-Directed Web Platform & Prompt Engineering System Architecture

GitHub & Live demo available on portfolio

- Architected and built an executive glassmorphic web platform and multi-format ATS resume engine using advanced Prompt Engineering techniques, structured AI system directives, and AI pair-programming.
- Formulated structured prompt chains, persona definitions, and system constraints to direct AI agents in generating modular HTML5/CSS3 layout systems, dynamic JavaScript stat counters, and automated SEO optimization pipelines.

Smart Geo-Hazard Precaution System using IoT, AI & LoRaWAN

Published international conference paper (ISBN: 978-8192098401)

- Engineered an autonomous solar-powered landslide warning system on Raspberry Pi 4, integrating MEMS accelerometers, soil moisture, and rain sensors for real-time hazard monitoring.
- Trained a Random Forest Classifier in Python (Scikit-learn) on IMD environmental datasets, achieving 92.86% predictive accuracy for real-time hazard risk detection.

EDUCATION

B.E., Electronics and Communication Engineering — CGPA: 8.01

M.I.E.T. Engineering College

2021 - 2025

Trichy, Tamil Nadu

Secondary & Higher Secondary Education

Vidiyal Matriculation Hr. Sec. School — | SSLC: 90.0% | HSC: 72.6% |

Trichy, Tamil Nadu

CERTIFICATIONS

- Foundation in AML and KYC — CPD Group Approved Provider
- Business Analytics with Excel — SimpliLearn / Microsoft SkillUp
- Naalayathiran (IBM SkillsBuild) — Naan Mudhalvan Scheme
- Network Essentials — CISCO, Naan Mudhalvan Scheme
- Industrial IoT and Industry 4.0 — TANSAM, Naan Mudhalvan Scheme
- Introduction to JIRA — SimpliLearn SkillUp
- Power BI Workshop (AI Dashboards) — OfficeMaster
- Data Analytics Job Simulation — Deloitte via Forage
- Certificate in Data Visualization & Effective Communication — Great Learning Academy

PUBLICATIONS & CONFERENCES

- "Smart Geo-Hazard Precaution System using IoT and LoRaWAN" — United International Conference on Technologies, Research, Product Developments and Space Science, in collaboration with ISRO Space Tutor Centre & SEGi University Malaysia (May 2025).
- "Air Quality and Emergency Safety in Public Restrooms using IoT" — 7th National Conference on Emerging Trends in Communication and Networking, Kongunadu College of Engineering & Technology (Apr 2024).
